展会概况

2022年亚洲绿色建筑及室内装饰展览会于9月6日至8日在金沙会展中心成功举办，在经历了两年的大流行之后，共吸引了来自48个国家的9,409名与会者参加。

本届亚洲绿色建筑及室内装饰展览会共有168个品牌参展，发掘11,000多条销售线索，为创新者、解决方案提供商、分销商和销售商与决策者、买家和标准专家搭建互动的平台，以达成有效业务联系。

Cutting-edge technologies and valuable insights to be presented at IBEW 2022

The International Built Environment Week (IBEW) runs from 5 to 9 September 2022, with the Sands Expo Conference and BEX Asia Expo exhibition to be held from 6 to 8 September 2022. Both events will be held in parallel at Sands Expo and Convention Centre, Marina Bay Sands, Singapore.

This year BEX Asia is expected to showcase some 200 brands and solutions from over 20 countries, and host more than 10,000 professionals and decision-makers from Singapore, the region and beyond. It will feature a wide range of solutions for the built environment including HVAC products, robotics systems, building materials, energy management solutions, IoT sensors, and digital solutions.

Digitisation takes centre-stage

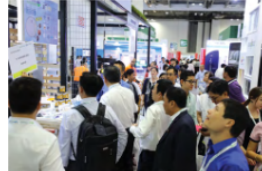

A strong array of tech and digital concepts like Autodesk, Cisco and Microsoft will be featuring their latest technologies and solutions. Autodesk will be showcasing its capabilities in the online with insurance, engineering, and construction (AEC) fields, including in the application of Digital Twins in the planning, designing, building and construction phases.

Visitors will be introduced to Submittals, an advanced solution from Oracle, its a 3D digital twin platform that is connected to support every stage of the building and lifecycle. Microsoft is presenting its smart building solutions that save the way for a greener and more resource-efficient built environment. Other well-known names who will be present at BEX Asia include Canon Singapore, Canon Imaging Solutions Singapore, Hupac Singapore Polymers, Vivax Singapore, Ministry of Clean Water Technology and Schneider (Singapore).

real-time self-assessment survey. Other highlights at BEX Asia 2022 include technical seminars and networking events. Further driving the conversation on cutting-edge building technologies will be the BEX Conference. Featuring a stellar line up of over 60 industry leaders and domain experts, the BEX Conference will take on their topics and share on the latest technologies and trends, covering three core pillars – Sustainability & Green Economy, Technology & Innovation, and Leadership & Future Growth.

The line-up of speakers includes Mr. Ho Kah Seng, Founder, S&P Architects, Prof. Leo Peh, Founding Principal, Pehony Studio & Partners, Academy, Dr. Tang Kah Phoo, President, Singapore Green Building Council, Mr. Pedro-Franco Santiago, Chairman & CEO, Burekoff Building International, and Dr. Johnny Wong, Deputy Chief Executive Officer, Building, Planning & Construction Board.

The IBEW Conference will also

bring together some 400 CDOs and senior management personnel from major architects, builders, specialist suppliers, consultants, solution and services providers, and financiers, in an inclusive, by invitation only CEO in Conversation session, on 8 September. The event is leading together connecting success.

Participants at IBEW 2022 can also look forward to also visit the International Built Environment Week.

The International Built Environment Week (IBEW) is organized by BCA International, a wholly owned subsidiary of the Building and Construction Authority, in partnership with local trade associations and supported by 12 Trade Associations and Chambers.

EVENTS

IBEW 2022: Building blocks for the future

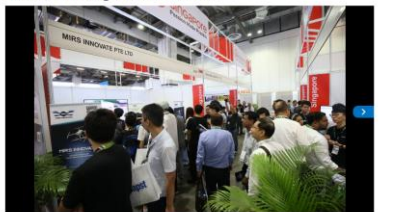

Photo credit: BEX Asia

Singapore – The built environment sector is changing the way it designs, builds, and operates to sustain competitiveness while addressing challenges such as climate change and manpower scarcity and keeping in step with the Singapore Green Plan 2030. Cutting-edge technologies like 3D scanning, IoT powered energy and facilities solutions, Integrated Digital Delivery for projects along with insights and thought leadership are what attendees can expect at the International Built Environment Week (IBEW) Conference and its trade exhibition, BEX Asia.

IBEW runs from 5-9 September 2022 with the tentpole IBEW Conference and BEX Asia, from 6-8 September 2022. Both events will be held in person at Sands Expo & Convention Centre.

This year, BEX Asia is expected to showcase some 200 brands and solutions from over 20 countries, and to host more than 10,000 professionals and decision makers from Singapore, the region and beyond. It will feature a wide range of solutions for the built environment including HVAC, robotics systems, building materials, energy management, IoT sensors, and digitalisation. Digitalisation solutions in particular is a strong focus in BEX Asia 2022, in line with the evolving demands from the built environment industry.

News

The cornerstone of Singapore's built environment sector

IBEW 2022 will be a significant milestone for the industry as it marks the 10th anniversary of the event. The event will showcase the latest technologies and solutions for the built environment sector, including 3D scanning, IoT powered energy and facilities solutions, and Integrated Digital Delivery for projects. The event will also feature a series of seminars and networking events, providing a platform for industry leaders to share their insights and experiences.

Participants at IBEW 2022 can also look forward to also visit the International Built Environment Week.

This year's edition will address challenges such as climate change and manpower scarcity, and keeping in step with the Singapore Green Plan 2030.

BEX Asia is also expected to showcase some 200 brands and solutions from over 20 countries, and to host more than 10,000 professionals and decision makers from Singapore, the region and beyond.

THE STRAITS TIMES LIFE

5 bright ideas for sustainable urban growth

Photo credit: BEX Asia

House owners, construction firms and architects are embracing 3D-printed prefabricated bathroom units (PBUs) earlier this week, making a splash at the BEX Asia Summit.

Builders are one of the most complex parts of a house to build as they require more formwork – walls, roofs and shower pans – per square foot than any other part of the house. These formwork is usually made of wood, which is often recycled and reused. However, 3D-printed PBUs are made of concrete, which is more sustainable and cost-effective.

#ibew2022 is back with a full house of excited delegates from local & abroad. Glad to see a greater focus on sustainability, net zero, green technology and finance this year. More importantly, many speakers call for partnership and people-centric design and technology application to accelerate greener, healthier and more sustainable spaces. I am glad to share our humble experience from CDL's 2-decade green building journey and net zero commitment on the panel titled 'Towards a Low Carbon Built Environment Ecosystem'. Indeed, a net zero built environment will require a large ecosystem of stakeholders along the value chain to design, build and manage buildings with energy and resource efficiency and productivity in mind. RE & energy efficient technology will need to be supplemented by circularity measures and innovative solutions for effective decarbonization. With **World Green Building Council's** Advancing Net Zero whole life carbon approach, and SBTi's requirement for reduction target set for Scope 3, we need to procure sustainable and low carbon materials as well as engaging tenants and investment assets to share the same low carbon commitment.

I am pleased to represent the **Singapore Institute of Building** at the Opening Ceremony of the **International Built Environment Week (IBEW)**. The Minister spoke at length about his vision with the refreshed Built Environment Industry Transformation Map, with the aim of enhancing collaboration and trust within our sector. Cheers to quality jobs, supported by a competent Singaporean core!

A pleasure to be part of the panel speaker for International Built Environment Week (IBEW) - DrMA: The Opportunities Ahead.

I am glad to share JP's role in building resilience and creating value for the built environment industry. Being the first Integrated Construction Park in Singapore, JP will bring together various elements of the construction industry to eliminate multiple truck trips, intensify land use and facilitate source diversification from the region and beyond. I had an invigorating discussion with **Teck Lun Lee** (McKinsey & Company Singapore), **Chua Zi Jun** (DP Architects), and **Xavier Pek** (Robin Village International), moderated by **Ramamoorthy** (DigitalBuild).

Thanks to **Building and Construction Authority** for International Built Environment Week (IBEW)

Concluded the iBuildSG Built Environment Formation Programme (BEFP) for **Singapore Polytechnic** and **Singapore Institute of Technology** students, in conjunction with the **International Built Environment Week (IBEW)** held at Marina Bay Sands.

Contributions towards these events underscores our commitment in supporting Singapore's transformation efforts, specifically towards the recently refreshed Built Environment Industry Transformation Map (BE ITM). We will continue to deepen such strategic partnerships to foster greater work collaboration and develop new approaches and capabilities in the sector.

Looking forward to a more Sustainable and Digitally-Driven Built Environment!

And that's a wrap! It was a great pleasure to participate in #bexasia2022. As we continue democratizing #digitaltwin, we'd like to extend our gratitude to all who visited us at the booth, showed up at our seminar and spent time to provide invaluable feedback re our products/solutions during the past three days! Kudos to **Jacky Chan Kah Yuan, Charles Guo, Paul Wang Thye Ann** and **BEX Asia (Built Environment Xpo Asia)** team.
